

# SAGE video

## Social Work

SAGE Video streaming collections, for library purchase, are developed in partnership with leading academics to deliver cutting-edge research-oriented video within the social sciences.

Each collection includes a breadth of video types and lengths to support students such as case studies, tutorials, interviews with researchers and practitioners, documentaries, footage of real-life professional contexts, and more.

Leveraging SAGE's vast network of its own authors, contributors, and societies, the **SAGE Video Social Work Collection** brings real-world visual representation of what it means to learn, work, and lead in this expanding field of social work. The collection aims to showcase the skills necessary to become a social worker; give insights into different client groups; show practice at the micro, mezzo, and macro levels; and elevate understanding of how theory and policy relate to practice.

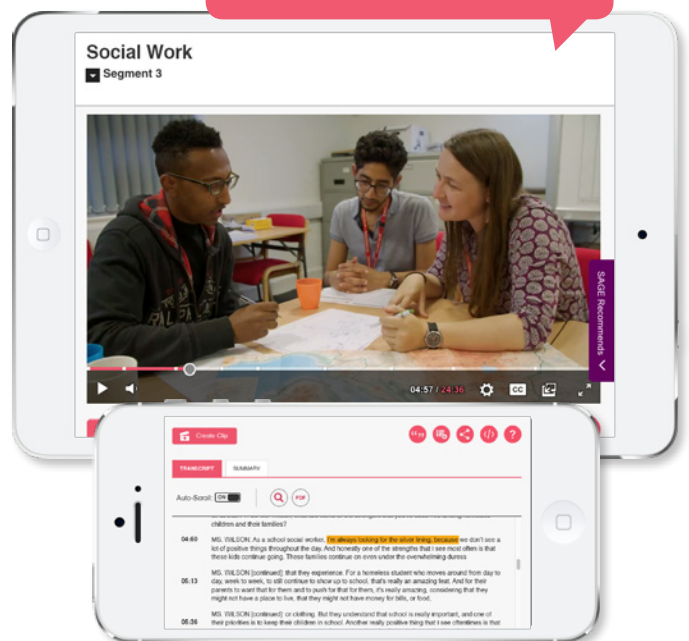

In addition, the collection will cover the core areas of social work as defined by the Core Competencies published by the Council on Social Work Education and the Professional Capabilities Framework published by The British Association of Social Workers.

**Around 100 hours and 340+ videos on these topics:**

- Social Work Administration
- Social Work Practice
- Social Work Skills
- Social Work Profession
- Social Work Research Methods
