THE SAGE INTERNATIONAL ENCYCLOPEDIA
OF MASS MEDIA AND SOCIETY

Five-Volume Set

Edited by Debra L. Merskin University of Oregon

This encyclopedia provides a thorough overview of mass media within social and cultural contexts, exploring the development of the mass communication industry, mass communication regulations, and societal interactions and effects. The reference comprehensively covers mass media around the world in its varied forms—newspapers, magazines, radio, television, film, books, music, websites, social media, mobile media—and describes the role of each in both mirroring and shaping society. The SAGE International Encyclopedia of Mass Media and Society assists students exploring such questions as: Has America become what sociologists call a mediated culture, where media reflect and create the culture? What is wrong or right with the theory that people generally choose what to watch or read based on what they already believe, and so media exert a negligible influence? What forces guide the books we read, movies we enjoy, television shows we watch and even the toys we buy? Why do ‘reality shows’ saturate TV network schedules? How can the Federal Communications Commission in the United States punish a network for ‘indecent broadcasting’ when the First Amendment protects freedom of expression? Do media reflect and project the view of a minority elite that control media? How does such control change with new media empowering previously unheard voices and individuals?

Edited by Paul Baines University of Leicester, Nicholas O’Shaughnessy Queen Mary University of London, and Nancy Snow Kyoto University of Foreign Studies

The Story of CQ Press

For decades, students, teachers, and researchers have turned to CQ Press for unbiased, expert coverage of American politics, public policy, and international affairs. We pride ourselves on providing our readers with the kind of nonpartisan analysis they need to make informed decisions inside and outside of academe.

We continue to publish titles in long-standing series, including America Votes, Historic Documents, and Political Handbook of the World, because continuity and consistency matter when it comes to making sense of complicated issues. And informed learners are best served by this foundation on which we build thoughtful, balanced analysis with each new iteration.

We value the knowledge and expertise of scholars and seasoned journalists in identifying the issues that matter most and translate complex situations into accessible analysis. This is why our Supreme Court editor and author of the Supreme Court Yearbook (since 1992), Kenneth Jost, regularly attends oral arguments and opinion readings at the Court itself. Similarly, Rhodes Cook, who has covered elections as a journalist for decades, continues to edit our America Votes series, now in its 33rd edition. While election data seems ubiquitous these days, he brings a highly detailed knowledge of the incredibly intricate electoral landscape that enables us to database election results with the precision that scholars require. We also work with scholars who are pushing the boundaries of political scholarship and helping to define their field. Their work is showcased in our long-standing CQ Press Guide series on political institutions, elections, and public policy.

We also partner with CQ Roll Call, one of the most respected publishers of political and policy reporting, on many of our products. With 70-plus years of covering Washington, they are the gold standard for nonpartisan reporting—a rare thing in today’s hyper-partisan news environment.

As editors at CQ Press, we are passionate about helping students and researchers understand the complexities of politics and public policy. We are proud to uphold the publishing traditions of those who preceded us while insuring that we are meeting the needs of a new generation of students.

WASHINGTON INFORMATION DIRECTORY 2019-2020
CQ Press
The Washington Information Directory is the essential one-stop source for information on U.S. governmental and nongovernmental agencies and organizations. This thoroughly researched guide provides capsule descriptions that help users quickly and easily find the right person at the right organization.

The Washington Information Directory offers three easy ways to find information: by name, by organization, and through detailed subject indexes. Although it is a "directory" the volume is topically organized, and within the taxonomic structure the relevant organizations are listed not only with contact information but with a brief paragraph describing what the organization (whether government or nongovernmental) does related to that topic. It is focused on Washington—in order to be listed, an organization must have an office in the Washington metropolitan area. These descriptions are not boilerplate advertising material from the organizations; rather, they are hand-crafted by a talented freelance research team. In addition, the Washington Information Directory pulls together 55 organization charts for federal agencies, congressional resources related to each chapter topic, hotline and contact information for various specific areas of interest (from Food Safety Resources to internships in Washington), and an extensive list of active congressional caucuses and contact details. It has two appendices, one with thorough information on congresspersons and committees, and the second with governors and embassies.

With more than 10,000 listing and coverage of the new presidential administration, the 2019–2020 Edition features contact information for the following:
- 16th Congress and federal agencies
- Nongovernmental organizations
- Policy groups, foundations, and institutions
- Governors and other state officials
- U.S. ambassadors and foreign diplomats
- Congressional caucuses

THE SAGE HANDBOOK OF MARXISM

Three-Volume Set

Edited by Sara R. Farris, Beverly Skeggs, and Alberto Toscano, all at Goldsmiths, University of London

The past decade has witnessed a resurgence of interest in Marxism both within and without the academy. Marxian frameworks, concepts and categories continue to be of narrative relevance to the features and events of capitalism today. Most crucially, an attention to shifting cultural conditions has forced contemporary researchers to re-confront some classical and essential Marxist concepts, as well as elaborating new critical frameworks for the analysis of contemporary capitalism. The SAGE Handbook of Marxism showcases the cutting edge of today’s Marxism, setting the agenda for Marxist understandings of the present and for the future. The handbook sets out from the premise that it is possible to bring together diverse work across the disciplines to demonstrate what is living and lively in Marxist thought, providing a trans-disciplinary ‘state of the art’ of Marxism, while inspiring contributions to areas of research that still remain, in some cases, embryonic. The aim is to demonstrate how attention to shifting social and cultural realities has compelled contemporary researchers to revisit and renovate classic Marxian concepts as well as to elaborate – in dialogue with other intellectual traditions – new frameworks for the analysis and critique of contemporary capitalism. A rigorous and challenging collection of scholarship, this book contains a stunning range of contributions from contemporary academics, writers and theorists from around the world and across disciplines, invaluable to scholars and graduate students alike.

THE SAGE HANDBOOK OF HUMAN TRAFFICKING AND MODERN DAY SLAVERY

Edited by Jennifer Bryson Clark, South Texas College, and Sasha Poucki, Rutgers, The State University of New Jersey

Millions of people around the world are forced to work without pay and under threat of violence. These individuals can be found working in brothels, factories, mines, farm field, restaurants, construction sites and private homes: many have been tricked by human traffickers and lured by false promises of good jobs or education, some are forced to work at gunpoint, while others are trapped by phony debts from unscrupulous moneylenders. The SAGE Handbook of Human Trafficking and Modern Day Slavery provides a comprehensive, interdisciplinary and global look at the diverse issues surrounding human trafficking and slavery in the post-1945 environment. Covering everything from history and politics to economics, international law and geography, themes are spread across six key parts:

Part One: Defining Contemporary Slavery
Part Two: Forms of Human Trafficking and Contemporary Slavery
Part Three: The Context of Human Trafficking and Contemporary Slavery
Part Four: Interdisciplinary Approaches to Human Trafficking and Contemporary Slavery
Part Five: Case Studies
Part Six: Ending Contemporary Slavery

THE SAGE HANDBOOK OF INTERNATIONAL MIGRATION

Edited by Christine Inglis, University of Sydney, Binod Khadria, Jawaharlal Nehru University, and Wei Li, Arizona State University

The rapid increase and diversification in the types of international migration over the last three decades, in conjunction with perceptions of its crucial significance far beyond the more traditional questions of immigrant settlement and incorporation in particular countries, have created a need among researchers, policy makers and commentators for definitive and informed publications which provide analysis and insights into key issues and debates which do more than report the findings of individual research projects. The SAGE Handbook of International Migration meets this need, which until this point has remained largely unmet despite the rapid increase in a range of academic journals, policy papers and edited compendiums as well as authored publications which seek to provide an inevitably selective overview of the issues involved in the field of international migration.

MEASURES FOR COMMUNITY AND NEIGHBORHOOD RESEARCH
Edited by Mary L. Ohmer Georgia State University, Claudia Coulton Case Western Reserve University, Darcy A. Freedman Case Western University, Joanne L. Sobeck Wayne State University, and Jamie Booth University of Pittsburgh

Measures for Community and Neighborhood Research is the first book of its kind to compile measures focused on communities and neighbourhoods in one accessible resource. Organized into two main sections, the first provides the rationale, structure and purpose, and analysis of methodological issues, along with a conceptual and theoretical framework; the second section contains ten chapters that synthesize, analyze, and describe measures for community and neighborhood research, with tables that summarize highlighted measures. The book will get readers thinking about which aspects of the neighborhood may be most important to measure in different research designs and also help researchers, practitioners, funders, and others more closely examine the impact of their work in communities.
