

SAGE video

Nursing

SAGE Video streaming collections are developed in partnership with leading academics, societies, and practitioners to deliver cutting-edge research-oriented video within the social sciences.

Each collection includes a breadth of video types and lengths to support students such as case studies, tutorials, interviews with researchers and practitioners, documentaries, footage of real-life professional contexts, and more.

The new **SAGE Video Nursing Collection** will feature content aligned to support traditional baccalaureate and masters level nursing programs. This collection will work to support such critical areas of nursing education that surpass the standard series on clinical skills presented in an array of demonstration, tutorial, and in practice videos. Interviews with active leaders and practitioners in the field are also included to provide insights into the many directions of a career in nursing.

SAGE has partnered with Medcom Trainex, a renowned nursing video producer, fully accredited by the American Nursing Credentialing Center, to produce 12 hours of original content matching its curricula.*

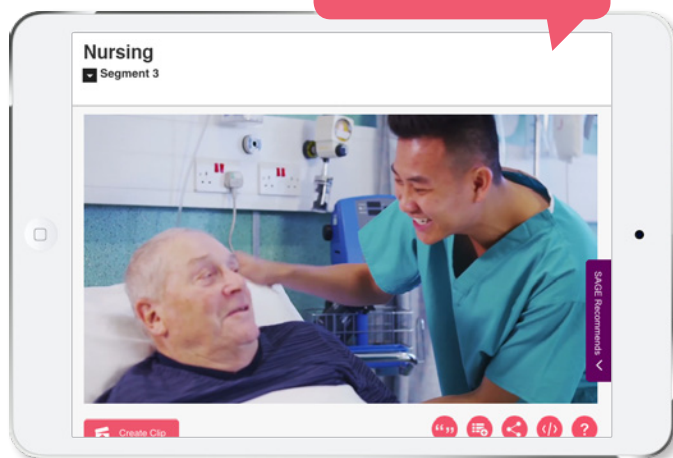

Around 75 hours and 350 videos on these topics

- Organizational and systems leadership
- Nursing scholarship and evidence-based practice
- Information management
- Nursing and the healthcare environment
- Inter-professional collaboration
- Professional issues
- Nursing roles and specialties

NEW! Assessment Tool

- Accessible only to instructors, questions specifically curated for each video to help supplement content
- Easily accessed on the corresponding video page and available for download
- Choose any or all of the questions from an editable file to customize for your needs

COMING IN 2020

User-centered design

Ease of use and accessibility are at the heart of our video program delivery. The site is mobile-optimized, and functionality meets student and faculty needs both in and outside the classroom. Videos can also be easily integrated into learning management systems.
