Detailed Contents

Preface **xvii**

About the Authors **xix**

1. Why *Readme First?* **1**
Goals 4
Methods and Their Integrity 4
Methodological Diversity and Informed Choice 5
No Mysteries! 7
Learning by Doing It: Qualitative Research as a Craft 7
Qualitative Research as a Challenge 9
Using *Readme First* 10
Terminology 10
The Shape of the Book 11
Doing Qualitative Research: What to Expect 14
Resources 19

PART I. THINKING RESEARCH **21**

2. The Integrity of Qualitative Research **23**
Methodological Purposiveness 23
Why Are You Working Qualitatively? 25
The Research Question Requires It 25
The Data Demand It 26
Should You Be Working Qualitatively? 27
How Should You Be Working Qualitatively? 29
From Selecting a Method to Making Data 30
From Choosing Sources and Sorts of Data to Managing and Analyzing Data 32
Methodological Congruence 34
Seeing Congruence by Doing It 34
The Armchair Walkthrough 36
And Now—Your Topic? 36
How to Find a Topic 38
You Are Already There 39
There Is a Gap in the Literature 39

Another Way of Looking Is Needed 40
What's Going on Here? 40
Supplementing Quantitative Inquiry 41
Now, Consider the Research Context 41
Considering What You Want to Know 41
Considering What You Are Studying 42
Considering the Setting 43
Considering What You Want to Do 43
Considering Issues in Finding Participants 44
Considering Ethical Constraints 44
From Topic to Researchable Question: Focusing Qualitative Inquiry 45
What Can You Aim For? 46
Summary 46
Resources 47

3. Choosing a Method 49
Description and Interpretation 50
Starting Simple 52
Five Methods 54
Ethnography 54
What Sorts of Questions Are Asked? 54
The Researcher's Stance 55
What Sorts of Data Are Needed? 57
What Do the Results Look Like? 58
Different Approaches Within Ethnography 59
Grounded Theory 61
What Sorts of Questions Are Asked? 61
The Researcher's Stance 62
What Sorts of Data Are Needed? 63
What Do the Results Look Like? 63
Different Approaches Within Grounded Theory 64
Phenomenology 67
What Sorts of Questions Are Asked? 68
The Researcher's Stance 69
What Sorts of Data Are Needed? 70
What Do the Results Look Like? 70
Different Approaches Within Phenomenology 70
Discourse Analysis 72
What Sorts of Questions Are Asked? 72

The Researcher's Stance 74
What Sorts of Data Are Needed? 74
What Do the Results Look Like? 75
Different Approaches Within Discourse Analysis 75
Case Study Method 75
What Sorts of Questions Are Asked? 76
The Researcher's Stance 77
What Sorts of Data Are Needed? 77
What Do the Results Look Like? 78
Different Approaches Within Case Study Method 79
Summary 79
Resources 81

4. Qualitative Research Design 87
The Levels of Design 88
Planning Design 88
The Scope of the Project 89
Designing the Scope 90
The Nature of the Data 91
Doing Design 93
Designing for Validity 94
Project Pacing 96
Conceptualizing Stage 96
Entering the Field 96
Setting Up and Managing a Data Management System 97
Sampling and Theoretical Sampling 98
Analysis 98
Designs Using More Than One Study 98
Mixed Method Designs 99
Combining Qualitative Studies 99
Combining Qualitative and Quantitative Studies 100
Multiple Method Designs 101
Synthesizing Multiple Studies 101
Using Different Ways of Looking 102
Comparative Design 102
Triangulated Design 103
Taking an Overview 104
Choosing Your Software 105

Using Your Software for Research Design 110
Approaches 110
Advances 111
Alerts 112
Summary 113
Resources 114

PART II. INSIDE ANALYSIS 117

5. Making Data 119
What Data Will Your Study Need? 120
What Will Be Data (and What Will Not)? 120
The Researcher in the Data 121
Good Data/Bad Data 122
Ways of Making Data 123
Interviews 126
Interactive Interviews 126
Semistructured Questionnaires 127
Conversations 128
Group Interviews 128
Observations 129
Online Sources 130
Video Recording 131
Photography 131
Documents 132
Diaries and Letters 132
Indirect Strategies 132
Who Makes Data? 133
Transforming Data 134
Managing Data 135
Managing Focus Group Data 137
The Role of Data 138
Yourself as Data 140
You and Those You Study 141
Your Experience as Data 142
Using Your Software for Managing Data 143
Approaches 143
Advances 144
Alerts 144
Summary 145
Resources 146

6. Coding **149**
Getting Inside the Data 152
A Reminder: The Distinctiveness of Qualitative Methods 152
Storing Ideas 153
Doing Coding 153
Descriptive Coding 154
What Is It Used For? 154
How Is It Done? 155
Where Is It Used? 155
Topic Coding 156
What Is It Used For? 156
How Is It Done? 156
Where Is It Used? 157
Analytic Coding 157
What Is It Used For? 158
How Is It Done? 158
Where Is It Used? 159
Theme-ing 160
Purposiveness of Coding 160
Tips and Traps: Handling Codes and Coding 161
Code as You Learn 162
Always See Coding as Reflection 162
Never Code More Than You Need 162
Manage Your Codes 163
Monitor Coding Consistency 164
Using Your Software for Coding 164
Approaches 165
Advances 165
Alerts 166
Summary 167
Resources 167

7. Abstracting **169**
The First Step: Categorizing 171
Categorization and Coding 171
Categorization as Everyday Strategy 172
The Next Step: Conceptualizing 173
Doing Abstraction 174
When Does It Happen? 174
How Is It Done? 176

Managing Abstraction 177
Documenting Ideas: Definitions, Memos, and Diaries 178
Growing Ideas 178
Managing Categories: Index Systems 179
Models and Diagrams 180
Using Your Software for Managing Ideas 180
Approaches 180
Advances 181
Alerts 182
Summary 183
Resources 183

8. From Method to Analysis: Revisiting Methodological Congruence 185
Ethnography 186
Working With Data 186
First-Level Description 186
Thick Description 188
Comparison 189
Strategies of Analysis 190
Grounded Theory 191
Working With Data 192
Memos and Their Importance 193
Data Preparation 193
Strategies of Analysis 193
Strategies That Facilitate the Identification of Process 194
Strategies for Coding 194
Strategies With Memos 196
Theory-Building Strategies 196
Changing Grounded Theory 198
Phenomenology 198
Working With Data 199
Strategies of Analysis 200
Discourse Analysis 202
Working With Data 203
Strategies of Analysis 204

Case Study Method 205
Working With Data 205
Strategies of Analysis 207
Summary 208
Resources 208

PART III. GETTING IT RIGHT 213

9. On Getting It Right and Knowing if It's Wrong 215
Ensuring Rigor in the Design Phase 216
Appropriate Preparation 216
Appropriate Review of the Literature 217
Thinking Qualitatively, Working Inductively 218
Using Appropriate Methods and Design 220
Ensuring Rigor While Conducting a Project 221
Using Appropriate Sampling Techniques 221
Responsiveness to Strategies That Are Not Working 222
Appropriate Pacing of the Project 222
Coding Reliably 223
When Is It Done? 224
Project Histories 224
Audit Trails 226
Your Findings and the Literature 226
Demonstrating Rigor on Completion of the Project 227
Triangulating With Subsequent Research 227
Reaffirming Through Implementation 227
Summary 228
Resources 229

10. Writing It Up 231
Ready to Write? 231
Who Is It for, and Where Will It Appear? 232
Writing Qualitatively 232
Using Your Data 233
When Do You Use Quotations? 234
Editing Quoted Material 234
Using Yourself 235
Brevity and Balance 235
Re-revisiting Methodological Congruence 236

Protecting Participants 237
Evaluating Your Writing 238
Polishing 239
Using Your Software for Writing 239
Approaches 239
Advances 240
Alerts 240
Writing Your Thesis or Dissertation 241
Beginning to Write 242
Writing an Article for Publication 244
Beginning to Write 245
After Publication, Then What? 249
Findings Used Alone 249
Use the Theory as a Framework for Practice 249
Bring the Implicit and the Informal to the Fore 250
Delimit Scope or Boundaries of Problems or Concepts 250
Describe the Problem and Aid in Identification of the Solution 250
Provide an Evaluation of Nonmeasurable Interventions 251
The Cumulative Effect of Research Results 251
Summary 251
Resources 252

PART IV. BEGINNING YOUR PROJECT 253

11. Groundwork for Beginning Your Project 255
Writing Your Proposal 255
Using the Literature Review 256
Writing the Methods Section 257
Estimating Time (and Related Resources) 258
Developing a Budget 258
A Note on Dealing With Available Data 260
Ensuring Ethical Research 261
The Challenge of Anonymity 261
Permissions 262
Participant Assent and Consent 263
Summary 266
Resources 267

12. Getting Started **269**
Why Is It So Hard to Start? 270
How Do You Start? 271
Start in the Library 271
Start With an Armchair Walkthrough 272
Start Thinking Method 273
Start With Yourself 273
What Role Should the Researcher's Personal Experience Play? 274
Hidden Agendas 274
Start Small 275
Start Safe 276
Start Soon 276
Start With a Research Design 277
Start Skilled 277
Start in Your Software 278
Congratulations, You've Started! 278
Resources 279

Appendix 1. Qualitative Software: Where to Go Next **281**
by Lyn Richards

Appendix 2. Applying for Funding **285**
by Janice M. Morse
