### Chapter 3: Preparing for Research

#### Setting Things Up
- The Ideal Research Process
- A Realistic Approach
- Personal Interest
- Science Versus Nonscience

#### Resources
- Time
- Money
- People

#### The Ethics of Social Research
- Milgram’s Obedience Experiment
- Zimbardo’s Stanford Prison Experiment
- What Does It All Mean?

#### Research and Institutional Review Boards

#### Theory—Explanation and Prediction

#### Alternative Paradigms for Building Theories

#### The Consequences of Paradigms

#### Idiographic and Nomothetic Theories

#### Nomothetic Is Not Necessarily Better
- The Gender Gap in Wages
- The Gender Gap in Voting
- The Second Demographic Transition
- Dowry Deaths

#### A Guide to Research Topics, Anyway

#### Generating Types of Studies
- Matching Kinds of Variables and Kinds of Problems

#### The Literature Search
- The Web of Science

#### Other Documentation Databases
- ERIC
- NTIS and FDsys
- PubMed
- PsycINFO
- Sociological Abstracts
- ProQuest Dissertations and Theses Database
- LEXIS/NEXIS
- OCLC

#### Meta-Analysis

#### Key Concepts in This Chapter

#### Summary

#### Exercises

#### Further Reading
Chapter 4: Research Design: Experiments and Experimental Thinking

Introduction
Experiments
Randomized Experiments
The Logic of True Experiments
Steps in the Classic Experiment
A Walk-Through of an Example
Internal and External Validity
Kinds of Confounds: Threats to Validity
History
Maturation
Testing and Instrumentation
Regression to the Mean
Selection of Participants
Mortality
Diffusion of Treatments
Controlling for Threats to Validity
The Classic Design
The Solomon Four-Group Design
The Two-Group Pretest-Posttest Without Random Assignment
The Posttest Only Design With Random Assignment
The One-Shot Case Study
The One-Group Pretest-Posttest
The Two-Group Posttest Only Design Without Random Assignment
The Interrupted Time Series Design
Thought Experiments
True Experiments in the Lab
True Experiments in the Field
Natural Experiments
Natural Experiments Are Everywhere
Naturalistic Experiments
The Small-World Experiment
The Lost-Letter Technique
Comparative Field Experiments
Bochner’s Field Experiments in Australia
Are Field Experiments Ethical?
The Watergate Experiment
Factorial Design: Main Effects and Interaction Effects
Key Concepts in This Chapter
Summary
Exercises
Further Reading
PART III: Data Collection

Chapter 8: Interviewing I: Unstructured and Semistructured

- The Big Picture 181
- Interview Control 181
  - Informal Interviewing 181
  - Unstructured Interviewing 182
  - Semistructured Interviewing 182
  - Structured Interviewing 183
- Unstructured Interviewing 183
  - A Case Study of Unstructured Interviewing 184
- Getting Started 185
- Letting the Informant or Respondent Lead 185
- Probing 186
  - The Silent Probe 187
  - The Echo Probe 187
  - The Uh-Huh Probe 187
  - The Tell-Me-More Probe 188
  - The Long Question Probe 188
- Probing by Leading 188
  - Baiting: The Phased-Assertion Probe 190
  - Highly Verbal and Nonverbal Respondents 190
- The Ethics of Probing 191
- Learning to Interview 191
  - The Importance of Language 192
  - Pacing the Study 192
- Presentation of Self 193
  - On Just Being Yourself 193
  - Little Things Mean a Lot 194
Chapter 11: Scales and Scaling

Simple Scales: Single Indicators
Complex Scales: Multiple Indicators
Indexes
  How Indexes Work
Guttman Scales
  The Coefficient of Reproducibility
  Some Examples of a Guttman Scale
  Data Scale, Variables Don’t
Likert Scales
  Steps in Building a Likert Scale
Item Analysis
  Scoring the Responses
  Taking the Interitem Correlation
  Cronbach’s Alpha
  Split Halves and the Combination Rule
  Finding the Item-Total Correlation
Testing for Unidimensionality With Factor Analysis
  Morokoff’s Sexual Assertiveness Scale for Women
Visual Props as Scales
  The Semantic Differential
  Cantril’s Ladder of Life
  The Faces Scale
Magnitude Scaling
  Magnitude Scaling of Constructs
  Magnitude Scaling of Countries’ Hostility to the United States
And Finally . . .
Key Concepts in This Chapter
Summary
Exercises
Further Reading

Chapter 12: Participant Observation

Introduction
What Is Participant Observation?
Some History
Fieldwork Roles
How Much Time Does It Take?
  Rapid Assessment and Applications Research
Validity—Again
Entering the Field
Chapter 14: Direct and Indirect Observation

Introduction
CM—Continuous Monitoring
  Assessing Work
  CM and Children
    One Boy’s Day
    The Zapotec Children Study
  Observing Grownups in the Field
  Studying Shoppers
Recording and Coding Behavioral Data
  Coding Schemes
Comparative Research—The Six Culture Study
Using Video for Continuous Monitoring
  CM and Reactivity
Spot Sampling (Scan Sampling) and Time
  Allocation Studies
  Reactivity in TA Research
  Sampling Problems in TA Research
    Night-Time Sampling
  Coding and Recording TA Data
Experience Sampling
A Few Final Words on Reactive Observation
Disguised Field Observation
  Pseudopatients Check Into a Psychiatric Hospital
    Critiques of Rosenhan’s Study
    Are These Pseudopatient Studies Ethical?
  The Tearoom Trade Study
The Ethics of Deception
  The Micturition Study
  Passive Deception
Behavior Trace Studies: The Archeology of Behavior
Archival Research
  Measuring Trends in Women’s Fashion
And Finally . . .
Key Concepts in This Chapter
Summary
Exercises
Further Reading
PART IV: Data Analysis

Chapter 15: Introduction to Qualitative and Quantitative Analysis

Introduction
Qualitative/Quantitative
What Are Data?
What’s Analysis?
  The Constant Validity Check
Data Matrices
  Profile Matrices
  Proximity Matrices
Presenting Results: Matrices and Tables
Presenting Results: Causal Flow Charts
Key Concepts in This Chapter
Summary
Exercises
Further Reading

Chapter 16: Analyzing Cultural Domains and Proximity Matrices

Introduction
Analyzing Free Lists
  Measuring the Salience of Free-List Items
  Selecting Items From a Free List for Further Study
Analyzing Pile Sort Data: Individual Matrices
Multidimensional Scaling
  How MDS Works
  Interpreting MDS Graphs
Analyzing Pile Sort Data: Aggregate Matrices
Cluster Analysis
  How Cluster Analysis Works
  Clusters of Cities
  Green Behavior and Electric Cars in the
    United States
Analyzing Triad Data
Analyzing Sentence Frames
Analyzing Paired Comparisons
Cultural Consensus Analysis
  Cultural Competence
  When Agreement Equals Knowledge: Equation 1
    Adjusting for Guessing
  When Agreement Equals Knowledge: Equation 2
    Assumptions of the Model
    Running Consensus Analysis
    Retrieving the Answer Key to a Test
    Making Up Questions for a Formal Consensus Test
    The Informal Model
Chapter 18: Analyzing Qualitative Data II: Grammar Beyond the Sentence

Introduction

Narrative Analysis
  Rubinstein’s Study of the Death of Mothers
  Bletzer and Koss’s Study: Comparing Narratives

Performance Analysis: Ethnopoetics
  Hymes’s Discovery of Ethnopoetics
  Tedlock’s Study of the *Popol Vuh*

Schemas, Models, and Metaphors
  Quinn’s American Marriage Schema
  Mathews’s Mexican Folktale Schema

Conversation Analysis
  Transcriptions
  Taking Turns and Repair Tactics
    How Repair Tactics Work
  Adjacency Pairs
  Dynamic Sequences
  Manzo’s Study of Taking Turns in a Jury

Language in Use
  Negrón’s Study of Situational Ethnicity in New York
    Dropping Hints and Doing Business
    There’s a Lot Going on Here, Too

Language and Power: Critical Discourse Analysis
  Gender and Discourse
  Doctor-Patient Interaction
    Borges and Waitzkin’s Study:
      Coding Doctor-Patient Interactions
    Presenting the Results

And Finally . . .

Key Concepts in This Chapter

Summary

Exercises

Further Reading

Chapter 19: Analyzing Qualitative Data III: Grounded Theory and Content Analysis

Introduction

Grounded Theory
  Coding Texts for Themes
    Kurasaki’s and Nyamongo’s Codebooks
  Linking Themes Into Theoretical Models
Regression
  Drawing the Regression Line
  How Regression Works
Calculating $r$ and $r^2$
  Testing the Significance of $r$
Nonlinear Relations
  Nonlinear Relations Are Everywhere
  Calculating Eta-Squared
Statistical Significance, the Shotgun Approach, and Other Issues
  Measurement and Statistical Assumptions
  Eliminating the Outliers
  Tests of Significance
  The Bonferroni Correction
  Statistical Power
  The Shotgun Approach
    The Problem With the Shotgun Approach
Key Concepts in This Chapter
Summary
Exercises
Further Reading

Chapter 22: Multivariate Analysis
  Introduction
  Elaboration: Controlling for Independent Variables
    Men and Women Voters
  Partial Correlation
    Car Wrecks and Teenage Births
  Multiple Regression
    The Multiple Regression Equation
    The MVD-TEENBIRTH Puzzle
    Two Examples of Multiple Regression
    Some Cautions in Doing Multiple Regression
  Path Analysis
    An Example of Path Analysis: Why Some Patients Wind Up Back in the Hospital
  Factor Analysis
    Factor Analysis and Scales
    Handwerker’s Domestic Activities Scale
  Discriminant Function Analysis
  And Finally . . .
Key Concepts in This Chapter
Summary
Exercises
