Foreword xii

*Geert Hofstede*

Introduction 1

## PART I: UNDERSTANDING “CULTURE” 7

1. The Concept of Culture 9
   1.1. The “Unpackaging” of Culture 10
   1.2. Meaning of the Word *Culture* and Definitions of the Concept 10
   1.3. Culture *As Is* Versus Culture *As It Would Be* 12
   1.4. Classifications of the Concepts of Culture 13
      1.4.1. Subjective Culture: Mental Software 13
      1.4.2. Objective Culture: Institutions and Artifacts 14
      1.4.3. Culture as a System of Behaviors 14
      1.4.4. Culture as a Set of Meanings 14
      1.4.5. Culture as an Independently Existing Phenomenon 15
      1.4.6. Culture as a Subjective Human Construct 16
   1.5. Conclusions About the Conceptualization of Culture 16

2. Main Characteristics of Culture 19
   2.1. Sharedness 20
2.2. Normalcy 22
2.3. Integration, Functionality, Rationality, and Logic 22
2.4. Stability and Changeability 23
2.5. Transmittability 24
2.6. Complexity 24
   2.6.1. National Culture 25
   2.6.2. National Culture Versus Organizational Culture 27
   2.6.3. National Culture Versus Religious Denomination Culture 28
2.7. Diffuseness 29
2.8. Uncontrollability 31
2.9. Predictability 32

3. The Elements of Culture 38
   3.1. Particular Elements of Culture 39
   3.2. Universal Elements of Culture 40
      3.2.1. Self-Reports 40
         3.2.1.1. Values 40
         3.2.1.2. Norms and Ideologies 42
         3.2.1.3. Values for Children 44
         3.2.1.4. Beliefs 44
         3.2.1.5. Behavioral Intentions 45
         3.2.1.6. Self-Reported Behaviors 45
         3.2.1.7. Attitudes 45
         3.2.1.8. Self-Descriptions 45
      3.2.2. Reports of Impressions of Others 46
         3.2.2.1. Peer Reports 46
         3.2.2.2. Idealistic Reports 46
         3.2.2.3. Stereotypes 46
      3.2.3. Mental Skills and Knowledge 51
         3.2.3.1. General Intelligence and Related Domains 51
         3.2.3.2. Perception Characteristics 52
      3.2.4. Cognitive Patterns 52
      3.2.5. Observable Behaviors 52
         3.2.5.1. Direct Observation of Behaviors 52
         3.2.5.2. National Statistics 53
      3.2.6. Statistical Products 53
      3.2.7. What Else Can Be Studied by Cross-Cultural Analysts? 54

PART II: STUDYING CULTURE 59

4. Types of Cross-Cultural Studies: Merits and Pitfalls 61
   4.1. Studies of Culture Versus Studies of Something Else 62
   4.2. Qualitative Versus Quantitative Studies 62
   4.3. Idiographic Versus Nomothetic Studies 62
   4.4. Insiders’ Versus Outsiders’ Studies 63
4.5. Studies Comparing Variables Versus Studies Comparing Cases 64
4.6. Structure-Oriented Versus Level-Oriented Studies 65
4.7. Synchronic Versus Diachronic (or Longitudinal) Studies 65
4.8. Deductive Versus Inductive Studies 66
4.9. Paper-and-Pencil Versus Observational Studies 66
4.10. Studies Using Primary Data Versus Studies Using Secondary Data 67
4.11. Studies Across Individuals First Versus Studies Directly Across Societies 68

5. Theoretical Versus Empirical Perspectives 72
5.1. Theory Before Empiricism 73
5.2. Empiricism Before Theory 75
5.3. The Goal of Culturology and the Other Social Sciences: Theory or Empiricism? 78
5.4. Defining Constructs Empirically 79
5.4.1. A Note on Operationalism as a Method of Defining Constructs in Culturology or Other Domains 79
5.5. A Search for Truth Versus a Search for What Works 80

6. Cross-Cultural Comparability 84
6.1. Etic Versus Emic Approaches 85
6.2. Incomparable Phenomena 87
6.3. Criteria for the Cross-Cultural Transferability of Etic Individual-Level Constructs and the Instruments for Their Measurement 87
6.4. Criteria for the Applicability of Etic Approaches to Studies at the Societal Level 89
6.5. Are Etic Tests Preferable to Emic Ones? 90

7. Paper-and-Pencil Studies 93
7.1. Selecting Samples of Respondents: Nationally Representative Samples Versus Matched Samples 94
7.2. Types of Items in Noncognitive Paper-and-Pencil Studies 95
7.2.1. Likert Scales 96
7.2.2. Free-Choice Items 96
7.2.3. Forced-Choice Items 96
7.2.4. Issues Associated With Likert Scales 97
7.2.4.1. The Reference Group Effect 97
7.2.4.2. Potential Meanings of Some Positions on a Likert Scale in Cross-Cultural Analysis 98
7.2.4.3. Extracting Societal Information From Items on a Likert Scale 98
7.2.4.4. Response Style 99
7.2.4.4.1. Detection of Response Style 100
7.2.4.4.2. Treatment of Response Style: Undesirable Bias or Normal Style? 101
7.2.4.4.3. Causes of Response Style: The Number of Points on a Likert Scale
7.2.4.4.4. Causes of Response Style: The Language of the Questionnaire
7.2.4.4.5. Causes of Response Style: The Role of Culture
7.2.4.4.6. Causes of Response Style: The Nature of the Items
7.2.4.4.7. Causes of Response Style: The Role of Intelligence and Education
7.2.4.4.8. Conclusions About the Causes of Response Style
7.2.4.4.9. Dealing With Response Style Before the Study: Choice of Items and Scales
7.2.4.4.10. Dealing With Response Style After the Study: Standardization of Scores
7.2.5. Issues Associated With Forced-Choice Items
7.2.6. Issues Associated With Free-Choice Items
7.3. Other Issues That Can Affect Data for Cross-Cultural Research
7.3.1. Poverty
7.3.2. Distance From the Researcher
7.3.3. Social Desirability
7.3.4. Taboos
7.3.5. Intelligibility Problems
7.3.6. Semantic Differences
7.3.7. Political Factors
7.4. Test-Retest Reliability of Paper-and-Pencil Studies at the National Level and Other Statistics
7.5. Face Validity
7.6. Common Method Variance and Validation

8. Data Analysis
8.1. Sample Issues
8.1.1. Selection of an Appropriate Sample of Societies
8.1.2. Galton’s Problem
8.1.3. Missing Data Bias
8.2. Dimensions of Culture
8.2.1. The Utility of the Dimension Paradigm in Cross-Cultural Research
8.2.2. The Nature of Cultural and Other Dimensions
8.2.3. Why Dimensions Are Subjective Human Constructs
8.2.3.1. Subjective Selection of Samples for the Construction of Dimensions
8.2.3.2. Subjective Selection of Items for the Construction of Dimensions

8.2.3.3. Subjective Selection of the Number of Dimensions

8.2.3.4. Subjective Selection of the Nature of the Dimensions

8.2.4. Individual and Ecological Dimensions: Different Levels and Units of Analysis

8.2.5. Polarity

8.2.6. Different Versions of the Same Ecological Dimension?

8.2.7. Dimensions and Polythetic Classes

8.2.8. Data Reduction

8.2.8.1. Agreement and Aggregation

8.2.8.2. Correlations and Scales

8.2.8.3. Scale Reliability

8.2.8.4. Multidimensional Scaling

8.2.8.4.1. Plotting Variables on an MDS Map

8.2.8.4.2. Identifying Cultural Dimensions on an MDS Map

8.2.8.4.3. Plotting Cases on an MDS Map and Calculating Case Coordinates

8.2.8.4.4. Using MDS for Identifying Typologies

8.2.8.4.5. Issues Related to Multidimensional Scaling as a Data Reduction Technique

8.2.8.5. Factor Analysis

8.2.8.5.1. Calculation of Factor Scores

8.2.8.5.2. Issues Related to Factor Analysis as a Data Reduction Method

8.2.8.5.3. Factor Analysis as a Scale Reliability Test

8.2.9. How Do We Know That We Have Constructed Appropriate Dimensions?

8.2.10. Constructing Individual and Ecological Dimensions

8.3. Clustering

8.4. Looking for Cause-and-Effect Relationships

8.4.1. The Consilience Approach

8.4.2. Contextual Consilience

8.4.3. Methodological Consilence

8.4.4. Predictive Consilience

8.4.5. Exclusive Consilience

8.4.6. The Issue of Time Sequence

8.4.7. Looking for Noncultural Variables That May Be Determinants of Culture

8.4.8. Multiple Regression Analysis

8.4.8.1. Divergent Results From Different Types of MRA

8.4.8.2. The Excluded Variables
### PART III: MAJOR CROSS-CULTURAL STUDIES

9. Cultural Dimensions Across Modern Nations

PART IV: A SUMMARY OF THE OBSERVED CULTURAL DIFFERENCES ACROSS THE GLOBE 407

10. Cultural Differences Between Rich and Developing Countries 409
11. Cultural Differences Across Rich Countries 417
12. Cultural Differences Between Eastern Europe and Latin America 420
13. Cultural Differences Between East Asia and the Arab World 425
14. Cultural Differences Between the Arab World and Sub-Saharan Africa 430
