Preface xi
   The Goal of This Text xii
   What’s New in the Third Edition xii
   To the Student xiii
   To the Instructor xiii
   Organization of This Text xiii

Acknowledgments xv

1. Why Do Research on Families? 1
   What Are the Stages of Social Research? 2
      Exploration 2
      Description 3
      Explanation 4
      Prediction 4
      Intervention 5
      Evaluation 6
   How Is Research on Families Different? 6
      Families Are Systems of Individuals 7
      Defining Family 8
      Multiple Statuses and Multiple Roles 8
      Backstage Behavior 9
      Preconceptions About the Family 9
   The Benefits of Well-Conducted Research 11
   Study Questions 12
   For Further Reading 13

2. Causal Inference in Family Research 14
   Variables 15
      Dependent Variables 15
      Independent Variables 15
A Simple Causal Model

Intervening (Mediator or Mediating) Variables

Moderating (Control or Moderator) Variables

Units of Analysis

Thinking Causally

Temporal Precedence

Constant Conjunction

Nonspuriousness

Identifying Mechanisms and Specifying Context

Assessing Causality

Framing the Hypothesis

Directional Hypotheses

Nondirectional Hypotheses

Cross-Sectional Versus Longitudinal Designs

Causal Inference in Qualitative Research

Study Questions

For Further Reading

3. Searching and Reading the Literature

Reading a Journal Article

Title

Author and Institutional Affiliation

Abstract

Introduction

Literature Review

Methods

Sample

Measurement

Procedures

Findings or Results

Discussion

Conclusions

References

Tables

Figures

Where Do I Go From Here?

How Do Journal Articles Get Published?

Research Monographs

Edited Volumes

Other Types of Publications

Study Questions

For Further Reading
4. Sampling Issues 47
   Defining the Population 49
   Sampling Designs 50
      Probability Samples 50
      Nonprobability Samples 53
   How Large Does the Sample Need to Be? 55
   How Do We Go About Choosing a Sampling Technique? 56
   Study Questions 56
   For Further Reading 57

5. How Do We Measure Concepts? 58
   Characteristics of a Good Measurement Procedure 59
   Levels of Measurement 60
      Levels of Measurement: Nominal 60
      Levels of Measurement: Ordinal 61
      Levels of Measurement: Interval 62
      Levels of Measurement: Ratio 62
      Summary of Levels of Measurement 63
   What Are Reliability and Validity? 63
      Reliability 64
      Stability 64
      Consistency 65
      Validity 65
      Face Validity 66
      Criterion Validity 67
      Construct Validity 67
      Content Validity 67
   Some Thoughts on Reliability and Validity 68
   Study Questions 69
   For Further Reading 69

6. Working With Scales and Indices 70
   Types of Scales and Indices 71
   Using Existing Scales and Indices 75
      Where to Find Them 75
      Permission, Copyrights, and So Forth 75
   How Do We Evaluate Scales and Indices? 76
      Dimensionality 76
      Determining Internal Consistency of Scales and Indices 76
   How Do We Deal With Missing Data in Scales and Indices? 77
      Strategies for Dealing With Missing Data 78
   Study Questions 79
   For Further Reading 80
7. **Studying Families: Quantitative Methods**  
   Studying Families Through Experiments  
   - Threats to Internal Validity  
   - Threats to External Validity  
   - Dealing With Threats to Validity  
   Studying Families Through Survey Methods  
   - Mailed Questionnaires  
   - Telephone Interviews  
   - Personal Interviews  
   - Time Diary Methods  
   - Surveys Over the Internet  
   - Other Modes of Survey Research  
   Studying Families Through Nonreactive Techniques  
   - Four Kinds of Errors Introduced by the Respondent  
   - Three Kinds of Errors Introduced by the Researcher  
   Types of Nonreactive Research  
   - Physical Traces  
   - The Running Record  
   - Advantages of the Running Record  
   - The Episodic and Private Record  
   Secondary Analysis of Sample Surveys  
   Some Limitations of Quantitative Methods  
   Study Questions  
   For Further Reading

8. **Studying Families: Qualitative Methods**  
   Qualitative Research Compared to Quantitative Research  
   Types of Qualitative Strategies  
   - Case Studies  
   - Ethnographies  
   - Focus Groups  
   Studying Families Through Observation  
   - Five Criteria  
   Evaluating Qualitative Research  
   Study Questions  
   For Further Reading

9. **Studying Families: Mixed Methods**  
   Mixed-Method Approaches to Family Research  
   - Explanatory Mixed-Methods Design  
   - Exploratory Design  
   - Triangulation  
   - Embedded Design
### 10. Using Other People’s Data

Advantages and Disadvantages of Secondary Analysis 122
What Are Some Sources of Data About Families? 123
Data From the U.S. Census Bureau 123
- Decennial Census 123
- American Community Survey 123
- Current Population Survey 124
- American Time Use Survey 124
Data From the Centers for Disease Control and Prevention 125
- National Survey of Family Growth 125
- National Survey of Children’s Health 125
Other Sources 126
- General Social Survey 126
- National Longitudinal Surveys 126
- National Survey of Families and Households 128
- Panel Study of Income Dynamics 129
- Marital Instability Over the Life Course 130
- The National Longitudinal Study of Adolescent Health 131
- National Children’s Study 131
- National Study of the Changing Workforce 131
- Public Opinion Polls 131
Sources of Secondary Data Sets 132
Future Trends in Secondary Data Analysis 133
Study Questions 134
For Further Reading 134

### 11. Analyzing Data on Families

Descriptive Statistics 136
- Measures of Central Tendency 136
- Measures of Variability 137
- Measures of Association 138
Interpreting Cross-Classification Tables 139
Inferential Statistics 141
Commonly Reported Tests of Statistical Significance 143
- The Chi-Squared Test 143
- Tests of Significance for Measures of Association 143
- Tests for Means 144
- Multiple-Regression Analysis 144
