**About the Author**

**PART I. CONCEPTUAL FOUNDATIONS OF THE ELABORATION MODEL**

**1 Introduction to Theory-Based Data Analysis**

- Key Concepts of Theory-Based Data Analysis
  - Data and Data Analysis
  - Constructs and Measured Variables
  - Relationships and Associations
  - Populations and Samples
- Explanatory Data Analysis
- Elements of the Elaboration Model of Theory-Based Data Analysis
  - The Elaboration Model
  - Third Variables
  - The Focal Relationship
  - Complementary Analytic Strategies
  - Interpretation of Findings
- The Elaboration Model Illustrated: Boundary-Spanning Work Demands
- Theory, Statistics, and Data Analysis
- The Inherent Subjectivity of Analysis
- Summary
- Looking Ahead
- Notes

**2 The Logic of Theory-Based Data Analysis**

- Inductive and Deductive Reasoning
  - Observation, Induction, and Theory
  - Theory, Deduction, and Observation
  - The Circuitous Link Between Theory and Observation
- Operationalization and the Assessment of Fit
  - Constructs and Measured Variables
PART II. REGRESSION WITH SIMPLE RANDOM SAMPLES AND COMPLEX SAMPLES

5 The Elaboration Model With Multiple Linear Regression

6 Regression With Survey Data From Complex Samples
PART III. THE ELABORATION MODEL WITH MULTIPLE LINEAR REGRESSION

7 Ruling Out Alternative Explanations: Spuriousness and Control Variables
   The Nature of Control Variables
   Spuriousness: The Illusion of Relationship
      Simple Spuriousness: The Three-Variable Model
      Complex Spuriousness: The Multivariate Model
   Spuriousness: Emotion Management
   The Statistical Analysis of Spuriousness
      Simple Spuriousness: The Three-Variable Model
      Multiple Control Variables
   HRS Analysis Journal 7.1 The Focal Relationship and Spuriousness:
      Life Satisfaction and Financial Strain
   Considerations in the Selection of Control Variables
   Summary
   Notes

8 Ruling Out Alternative Theoretical Explanations: Rival Independent Variables
   Redundancy: Competing Theories
   Redundancy: The Illusion of a Unique Relationship
      Simple Redundancy
      Complex Redundancy
   Redundancy: Emotion Management
   The Statistical Analysis of Redundancy
   HRS Analysis Journal 8.1 The Focal Relationship and Redundancy:
      Life Satisfaction and Neighborhoods
   Redundancy Versus Spuriousness
9 Elaborating the Focal Relationship: Mediation and Intervening Variables

Mediation: Specifying the Causal Mechanism
- The Intervening Variable
- The Theoretical Classification of Variables
- Mediation as Explanation
- In the Absence of Mediation

Mediation: Emotion Management

The Theoretical Classification of Variables

Mediation as Explanation

In the Absence of Mediation

Rival Intervening Variables: The Exclusionary Strategy Revisited

The Functions of Rival Intervening Variables

The Analysis of Rival Intervening Variables

Rival Intervening Variables: The Exclusionary Strategy Revisited

Rival Intervening Variables: Same-Sex Contact

Mediation With SEMs

Summary

Notes

10 Elaborating the Focal Relationship: Antecedent and Consequent Variables

Antecedent and Consequent Variables and the Focal Relationship
- The Conceptual Role of Antecedent and Consequent Variables
- The Focal Relationship as Mediation

Antecedent, Control, and Rival Independent Variables

The Statistical Analysis of Antecedent and Consequent Variables
- Antecedent Variables: The Focal Independent Variable as a Dependent Variable

HRS Analysis Journal 10.1 The Antecedent Variable: Discrimination and Financial Strain

Antecedent Variables: The Focal Independent Variable as an Intervening Variable

Mediation With SEMs

Summary

Notes
11 Specifying Conditions of Influence: Moderating Variables

Conditional Relationships

Types of Conditional Relationships
The Mechanics of Conditional Relationships
Symmetry
Generalization With Conditional Relationships

Conditional Relationships as Interactions
Numeric Moderators

HRS Analysis Journal 11.1 Moderation With Two Numeric Variables:
Life Satisfaction, Financial Strain, and Optimism
Dichotomous Modifiers
Categorical Modifiers

HRS Analysis Journal 11.2 The Categorical Moderator:
Racial/Ethnic Differences in the Effect of Financial Strain
Higher-Order Interactions
Nonlinear Interactions
Moderation Meets Mediation

Subgroup Analysis
Subgroup Versus Interaction Analysis
Considerations in the Selection of Moderating Variables
Summary
Notes

PART IV. THE ELABORATION MODEL WITH LOGISTIC REGRESSION

12 The Elaboration Model With Logistic Regression

The Elaboration Model With a Comprehensive Logistic Regression Model
Multivariate Logistic Regression
Inferences to the Population
Summary Measures of Fit
Model-Building Strategy and Comparison of Models

Northridge Analysis Journal 12.1 The Comprehensive Logistic Regression Model: Self-Perception of Being a Victim by Intensity of the Earthquake
